Contents Volume 134, June 1990

Benfu Yang and Wandi Wei (Chengdu, China)
Finite Orthogonal Geometries with Characteristic $\neq 2$ and PBIB Designs. I 1

Mao-Ting Chien (Taipei, Taiwan)
Boundedness of the Numerical Range 25

Matjaž Omladič (Ljubljana, Yugoslavia)
On Operators Preserving the Numerical Range 31

W. N. Anderson, Jr. (Teaneck, New Jersey), T. D. Morley (Atlanta, Georgia), and G. E. Trapp (Morgantown, West Virginia)
Positive Solutions to $X = A - BX^{-1}B^*$ 53

Robert Grone, Stephen Pierce (San Diego, California), and William Watkins (Northridge, California)
Extremal Correlation Matrices 63

Chen Yonglin (Nanjing, China)
The Generalized Bott-Duffin Inverse and its Applications 71

Shmuel Friedland (Chicago, Illinois)
Characterizations of the Spectral Radius of Positive Operators 93

A. Neumaier (Freiburg, West Germany)
Derived Eigenvalues of Symmetric Matrices, with Applications to Distance Geometry 107

C. A. J. Hurkens (Eindhoven, The Netherlands)
Blowing Up Convex Sets in the Plane 121

Jure Škarabot (Ljubljana, Yugoslavia)
The Extremal Case of a Matrix Inequality 129

Zhongshan Li (Raleigh, North Carolina)
The Determinants of GCD Matrices 137

Arnold Knopfmacher and John Knopfmacher (Johannesburg, South Africa)
The Distribution of Values of Polynomials over a Finite Field 145

František Neuman (Brno, Czechoslovakia)
Finite Sums of Products of Functions in Single Variables 153

Raphael Loewy (Williamsburg, Virginia)
Linear Maps Which Preserve a Balanced Nonsingular Inertia Class 165

Book Review

Thomas H. Foregger (Warren, New Jersey)
Review of *Nonnegative Matrices*, by Henryk Minc 181

Author Index 185
